ABSTRACTED-PUB-NO: KR2004016477A

BASIC-ABSTRACT:

NOVELTY - A portable terminal having a microphone device capable of varying directivity is provided to use selectively a fixable microphone device or a variable microphone device by composing the variable microphone device.

DETAILED DESCRIPTION - A rotatable camera lens housing(50) has a camera lens

which is located at one end side of an axis same with the axis of a hinge device and is rotatable by a desired angle. A rotatable microphone housing(60)

has a variable microphone device(62) which is adjacent on an axis same with the axis of the rotatable camera lens housing(50) and is variable in directivity. The rotatable microphone housing(60) is composed with the rotatable camera lens housing(50) by one body, and is rotated in a direction same with the rotation direction of the rotatable camera lens housing(50).
